👤 PROFESSIONAL SUMMARY

Performance-driven AI Engineer with hands-on industry experience building Agentic AI systems and Retrieval-Augmented Generation (RAG) pipelines. Specialized in developing production-ready LLM workflows and scalable AI microservices. Proven track record of transforming complex PoCs into enterprise-grade solutions using Python, Langflow, and Docker.

🧰 PROFESSIONAL EXPERIENCE

Junior AI Engineer, Evaluateserve 08/2025 – Present

- Architected end-to-end AI workflows using Langflow and Python, streamlining the automation of internal business processes and increasing operational efficiency.
- Designed robust prompt engineering strategies and LLM evaluation pipelines, improving model response accuracy and significantly reducing hallucination rates.
- Orchestrated Docker-based deployments of AI microservices, ensuring consistent environment parity and reducing deployment time for production updates.

AI Engineer Intern, Evaluateserve 02/2025 – 08/2025

- Built internal AI tools and chatbots
- Rapidly prototyped Proof of Concepts (PoCs) using various LLM frameworks, helping the firm secure new client AI projects.
- Got to learn basic Dockers and Kubernetes.

🧠 TECHNICAL SKILLS

Core Tech

Python (Advanced), SQL.

AI Specialization

Agentic AI, RAG, Prompt Engineering, LLM Evaluation (RAG), Computer Vision, LLMOps, Prompt Engineering, Context Engineering, NLP, Deep Learning.

Tools & DevOps

Langflow, Flask Docker, Git, MySQL, ParallelAI.

Database

ChromaDB, PostgreSQL, MongoDB

Backend And APIs

FastAPI, Node.js, RestAPI, SQLAlchemy

Systems & Architecture

Microservices Architecture, Computer Networks, OOPS, DBMS, Operating System

Projects

OmniMemory , AI-Powered Personal Knowledge Engine 06/2026 – 08/2026

- **Tech:** Python · FastAPI · LangChain · ChromaDB · Groq · Next.js
- Built a full-stack AI knowledge engine for PDF, DOCX and TXT ingestion, semantic search and conversational querying using **RAG, HuggingFace embeddings and ChromaDB**.
- Developed automated document intelligence for **summarization, topic extraction, sentiment and language analysis**, with FastAPI backend and Next.js frontend.

Persona.AI , AI Character Chat Studio 06/2025 – 07/2025

- **Tech :** *Python · Groq · Streamlit · Docker*
- Built an AI character platform enabling configurable personalities, context-aware conversations and consistent character behavior.
- Implemented **multi-character conversations, autonomous interactions and debates**, with Docker-based deployment.

NightVision.AI , Multimodal Computer Vision 10/2024 – 12/2024

- **Tech :** *Python · OpenCV · YOLOv8 · Groq Vision*
- Built a hybrid low-light vision pipeline combining **OpenCV enhancement and YOLOv8 object detection** for challenging visual environments.

ChatScope.AI , Privacy-First WhatsApp Intelligence 06/2024 – 08/2024

- **Tech :** *Python · NLP · TF-IDF · Streamlit · Groq*
- Built an analytics platform for extracting communication patterns, activity trends and behavioral insights from WhatsApp conversations.
- Implemented **local TF-IDF semantic search** and an optional Groq-powered conversational/RAG assistant.

EDUCATION

B.E. - Computer Science Engineering Hons. With specialization in AIML 2021 – 2025

Chandigarh University
CGPA: 8.10
